

CMW Extreme Synthetic Blend Motor Oil W **ENTECH** Additive

Description:

CMW Extreme Synthetic Blend Motor Oil is a premium-quality, synthetic blend motor oil designed for use in passenger cars, vans, sports utility vehicles and light trucks under all operating conditions. It is formulated with our proprietary **ENTECH** Additive to provide excellent wear protection, to minimize engine sludge and to resist viscosity and high-temperature thermal breakdown. It also protects against rust, bearing corrosion and foaming. The Extreme Synthetic Blend with **ENTECH** formulation provides an extra margin of protection at both low and high temperatures compared with conventional all-mineral motor oils. All grades meet API service classification SM. Grades 5w20, 5w30 and 10w30 are energy conserving ECII, ILSAC GF-4.

- **ENTECH** Additive
- Friction-modified for improved fuel economy
- Formulated to help protect vehicle emissions control systems
- Resists viscosity and thermal breakdown at high temperatures
- Protects against engine sludge and varnish deposits
- Excellent wear protection
- Excellent rust and bearing corrosion protection

Available Weights

- 5w20
- 5w30
- 10w30
- 10w40
- 20w50
