

ENGINE ASSEMBLY LUBE

>>Description

CMW Oil Company's Engine Assembly Lube is formulated to provide extra protection to engine components during assembly. Entech Engine Assembly Lube provides protection against scuffing, wear and friction during critical break-in. This lubricant is recommended for use on several different engine components. such as: rocker arms, rocker shafts valve stems, pistons and piston rings, gears, roller lifters, push rods and camshafts.

>>Features

- >**No Molybdenum Disulphide**
- >Protects against Micro Welding
- >Protects against Scuffing
- >Protects against Galling
- >Protects Cylinder Walls
- >Compatible with all Engine Oils

>>Automotive Applications

- >Pistons
- >Piston Rings
- >Wrist Pins
- >Valve Stems
- >Gears
- >Roller Lifters
- >Camshafts
- >Timing Chain Sprocket
- >Cylinder Walls
- >Rocker Arms
- >Rocker Arm Shafts

>>Typical/Test Data

Appearance: **Transparent**
