

PRO SERIES SEMI SYNTHETIC RACING OIL SSR

>>Description

Pro Series Semi Synthetic Racing Oil designed with our proprietary Entech additive technology for superior performance for racing and high performance engines. SSR is simply the next generation of lubrications and superior performance. SSR is a special blend of premium petroleum base stocks, special polymers and proprietary Entech additives for superior performance and engine protection. SSR is a proven race formula that offers excellent thermal stability under extreme conditions and high operating temperatures of high performance engines. Our Entech additive formula which provides unequalled anti-friction, anti-wear and minimizes frictional losses for increased power. SSR protects against scuffing, galling and metal transfer.

>>Features & Benefits

- Entech Additive Technologies**
- Highest level of engine protection**

>>Typical Use

Pro Series Semi Synthetic Racing Oil SAE 5w20 5w30 10w30 10w40 0w40 15w40 20w50 Recommended for racing and high performance engines.

Exceeds API performance requirements. Intended for racing applications.
