Heavy Duty Turbine 68

>>Description

CMW Heavy Duty Turbine Oil 68 is compounded from high viscosity paraffin base oils and an additive package to provide excellent protection against oxidation, corrosion, foaming and emulsifying. Superior oxidation stability at high temperatures and reduces oil thickening. These oils are for use in many types of turbines (gas, hydro electric and steam) compressors, pumps and bearings. CMW Heavy Duty Turbine Oil 68 is a good choice for machinery having silver bearings that can be damaged by "anti-wear" oil which contain zinc.

>>Typical/Test Data

ISO GRADE	68
Viscosity:	
SUS @ 100°F	337
SUS @ 210°F	54.8
cSt @ 40°C	68
cSt @ 100°C	8.6
Viscosity Index	99
Pour Point °F	5
Flash Point °F	485
Color D-1500	2
